## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Avery et al (US patent 6,181,008).

Avery's device disclose a power system comprising a power converter (see abstract), a land grid array socket mounted on array of contacts at 18 or 20, the power converter adapted to convert the voltage corresponding to an array of contacts on the land grid array socket. The contact pads are fabricated with electrically conductive material (see cols 1-2, line 61-7). The conductive metal circuitry at 18 or 30, 38 uses as printed circuit board mounted to the grid array package in a single direction, a minimum compression force is applied to connect the circuits 22 and 30. However, Avery's device fails to disclose the arrangement of converter in relation with the grid array socket. It would have been obvious to one having ordinary in the art at the time the invention was to place the grid array socket on an array of contacts mounted on the surface of the power converter, since it has been held that rearranging of parts of an inventtion involves only routine skill in the art. In re Japike, 86 USPQ 70.

*Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McCormick (US patent 6,369,724), Kelkar et al (US patent 6,084,308) and Wenzel et al (US Patent 6,150,724) devices disclose a power converter with a land grid array socket.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean Duverne whose telephone number is (703) 305 - 0297 . The examiner can normally be reached from 8:30 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus, can be reached on (703) 308 - 3119. The fax phone number for this Group is (703) 308 - 7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
